Duo helps healthcare organizations meet Electronic Prescriptions for Controlled Substances (EPCS) compliance requirements in a quick and easy way.

**THE CHALLENGE:**

**E-Prescribing for Controlled Medications**

E-prescribing is growing in adoption across all the U.S. by increasing prescription fill rates for patients and helping them adhere to medications, while improving their general health outcomes. E-prescriptions also reduce cases of fill fraud and error, by maintaining records.

E-prescriptions for controlled medications require extra EPCS controls for healthcare providers to be able to prescribe. To meet the EPCS compliance requirements, organizations need to deploy additional security solutions, which can be time and resource-consuming. Duo makes it easy.

“Duo integrates with Epic, which means we were able to be an early adopter of EPCS functionality in Epic, with 1000+ providers currently enrolled.”

Security Manager, Large Enterprise Healthcare Company

Duo integrates with the most popular apps, including:

- Epic
- Citrix
- VMware
- Outlook
- Office 365

THE SOLUTION:

Easy and Compliant E-Prescriptions

Duo helps healthcare organizations meet EPCS compliance requirements in three easy ways:

01 Approve E-Prescriptions with a Single Tap

Duo provides a self-enrollment option helping doctors enroll within minutes. Once enrolled, doctors can use Duo's one-tap push notification on their smartphones to authenticate and approve e-prescriptions. Doctors may also choose other authentication methods available with Duo such as hard tokens or soft tokens with Duo Mobile.

02 Prove Compliance with Comprehensive Reporting

Duo helps health organizations prove compliance and become audit ready with extensive reporting and logging. Duo's comprehensive logs can be used to show evidence of compliance and can be exported to your log management system for analyzing security risks. Administrators can easily stay on top of key security events in their network with detailed and scheduled reporting.

03 Easily Integrate with Leading EHRs

Duo provides an out-of-the-box integration with leading Electronic Health Record (EHR) and e-prescription solutions (e.g., Epic Hyperdrive). Over 100 customers use Duo with Epic to approve e-prescriptions. To learn about other integrations supported by Duo, contact your Duo account executive.

“Duo has enabled us to use EPCS with a secure, easy-to-use, second factor of authentication.”

Kimberly Sucy
IAM Supervisor, Rochester Regional Health System

*Note: For the purposes of EPCS, choose between Duo Push, WebAuthn, security keys, OTP hard tokens, or FIPS 140-2 validated hardware tokens to help meet your compliance team’s interpretation of the Federal EPCS Guidelines.

Cisco Secure delivers a streamlined, customer-centric approach to security that ensures it’s easy to deploy, manage, and use. We help 100 percent of the Fortune 100 companies secure work – wherever it happens – with the broadest, most integrated platform.
