PeerStory: Duo Security

This PeerStory is a collection of quotes from a real user sharing their experience using Duo Security on PeerSpot.

Ata A.
Sr Modern Workplace Specialist at a logistics company with 10,001+ employees

★★★★☆

Use Case

The solution allows us to cover significant organizations and audit organizations with very high-security demands. At that level, security is non-negotiable, and Duo Security provides a second layer multi-factor server authentication, easy implementation, and Microsoft integration.

Valuable Features

The integration with Azure Active Directory and the AWS cloud is amazing, as most products nowadays require the creation of a customized integration. With Duo Security, it was more like native integration, and it took me five minutes to register.

> **"The initial setup is straightforward; Duo Security provides excellent documentation and support compared to other companies. This solution can be deployed in a day."**

the solution must come from a trusted organization. We don't want to place our security in the hands of unknown third-party organizations; data leaks are a genuine concern.

Results

Establishing trust for access requests is never an issue. This is a major factor because when it comes to security,

> **"The solution is straightforward, requiring minimal training and expertise to operate; IT staff have no problem understanding it."**

ROI

We definitely received an ROI; **the solution improved our security by perhaps 70%,** and this particular landing zone requires significant protection.
