Duo Security, Authentication Product Design Intern

Duo Security, now a part of Cisco, is the leading provider of Trusted Access security and multi-factor authentication delivered through the cloud.

Duo's mission is to make security simple for everyone. We were born from a hacker ethos and a desire to make the Internet a secure place. We believe in empowering people to follow their passions inside and outside of the office and enable every employee to bring their whole self to work.

Our team is our secret weapon. We run the spectrum from artists to analysts, low-key to high energy, and bring together a diversity of skill sets, experiences, and perspectives to solve what we consider to be the world's most pressing geopolitical challenge — transforming the security industry as we know it. Together we build solutions that are easy, effective, trustworthy, and enduring. And that's why we are the most loved and trusted company in security.

What you'll do…

As a **Product Design Intern**, you'll be working on mission-critical design solutions for products that millions of people around the world use to stay safe online.

As a core member of your project team, you'll get valuable experience in design, design research, collaboration, and project management.

You'll also be a part of the diverse and mature Product Design Team that is invested in your growth as a designer.

Skills you have…

- Current undergraduate or graduate enrollment preferred with a Graphic Design, Visual Communication, User Experience or Interaction Design focus, or at least 1 year prior work experience performing Visual or Interaction design
- Experience creating design solutions that address user needs, business goals and acknowledge technology constraints
- High level of design craft and can execute high-fidelity solutions using Sketch or related tools
- Amazing written and oral communication skills. Attentive to details, quality, and accuracy
- Superb collaboration, social, and product team relationship management abilities

- Self-motivated and capable of working independently
- Familiarity or experience with design research and User Experience design is a plus

Reasons why you should apply…

- You love creating design solutions that address real customer needs.
- You're curious about what the future of security means for businesses and end users. For instance, how can we help Duo admins identify risky activity in their end users' environment?
- You aspire to make meaningful improvements in the lives of the individuals, teams, and companies who use our product every day to do their most important work.

Internship Details...

- You'll be working with teams based out of our Ann Arbor, MI and Austin, TX offices
- Program dates are May 24th - August 20th
- Roles are full time and 40 hours per week, Monday - Friday
- Generous pay and employee perks

Duo is committed to cultivating and preserving a culture of inclusion and connectedness. We are able to grow and learn better together with a diverse team of employees. The collective sum of the individual differences, life experiences, knowledge, innovation, self-expression, and talent that our employees invest in their work represents not only part of our culture, but our reputation and Duo's achievement as well. In recruiting for our team, we welcome the unique contributions that all potential candidates can bring in terms of their education, opinions, culture, ethnicity, race, gender identity and expression, nationality, age, languages spoken, veteran's status, religion, disability, sexual orientation and beliefs.

And if this role is exciting to you, we encourage you to apply even if you don't meet all 100% of the description or qualifications. Finally and most importantly, we are a proud Equal Opportunity Employer.
